Konciar

An AI concierge platform that makes real phone calls on behalf of visitors to Korea and delivers confirmed real-world outcomes.

"We call, so you don't have to."

Core Problem

Visitors to Korea face a critical access gap

- Many Korean businesses still require phone calls
- Language barriers make calls impossible for tourists and overseas Koreans
- No existing platform solves legacy phone-based interactions

Konciar Solution

Konciar replaces the human phone call with AI

- Users submit a request (reservation, order, appointment)
- Konciar AI calls the business in Korean
- Handles humans, IVR systems, and DTMF inputs
- Delivers a confirmed result back to the user

Available on iOS & Android

Download the app and start making calls through AI.

System Flow

How Konciar bridges visitors with Korean businesses

Visitors

- Tourists, overseas Koreans, digital nomads
- Blocked by language and phone-only systems

→

Konciar AI

(Core Layer)

- Real-time speech understanding (STT)
- Conversational decision engine (LLM)
- Natural Korean voice output (TTS)
- IVR & keypad (DTMF) handling
- Conversation state management

→

Korean Businesses

- Restaurants, clinics, shops
- Continue using existing phone systems
- Zero behavior change required

→

Confirmed Outcome

- Reservation, order, or appointment completed
- Structured result delivered to user

Flywheel Effect

Calls become data. Data improves performance.

1. More users → more calls
2. More calls → higher success rate
3. Higher success → better trust
4. Better trust → repeat usage & subscriptions

Value Proposition

Why Konciar stands out

Eliminates barriers

Removes phone and language barriers completely

Works with legacy systems

Compatible with existing phone infrastructure

Outcome-based

Not information-based, delivers real results

Faster & reliable

More efficient than traditional human calls

Revenue Model

Multiple revenue streams for sustainable growth

Primary Revenue

- Pay-per-successful reservation or order

Visitor subscriptions

Recurring revenue from frequent travelers

Monthly B2B fees

Enterprise solutions for businesses

Premium services

Medical & beauty concierge services

Strategic Advantage

Why Konciar is uniquely positioned to succeed

Oldest interface

Operates on the phone, the most universal communication tool

Zero adoption barrier

Requires no platform adoption from businesses

Data transformation

Converts analog calls into structured, actionable data

Deep expertise moat

Difficult to replicate without call-flow expertise

Long-term Vision

Konciar becomes the **AI access layer for Korea**, bridging global visitors with local systems that never went digital.

"AI concierge for real-world actions."
